ABSTRACTED-PUB-NO: JP01225730A

BASIC-ABSTRACT: Ru is recovered by heating a waste resistor body coated with a mixt. of Ru oxide and metal oxides (glass) in the presence carbon in Cl<sub>2</sub> gas or a mixed gas of Cl<sub>2</sub> and reducing gas stream to evaporate the Ru oxide and metal oxides as chlorides. Pref. the Ru chloride is then recovered with a complex salt forming agent.

USE - For easily recovering Ru from a waste resistor comprising a substrate of metal oxides and a mixt. of Ru oxide and metal oxides coated on the substrate.
